Questions

#1: Are there any significant challenges that might hinder progress or keep you from meeting your project milestones? If so, please tell us about them.

Yes

Due to the long lead-in process of project scoping and finalizing interagency agreements, the consultant contracts for engineering and cultural resource investigation were not initiated until January 2020. All contracts are now in place and the work is underway but this will result in delays to a number of project milestones although we anticipate being able to meet the end date of the project.

Description is required

#2: Describe the work accomplished during this reporting period.

Design and engineering contract was awarded and the scope of work includes both Chambers RCO grants 18-1267D and 16-2616D. Cultural Resource Investigation has been awarded for both projects as well. Field investigations of the sites have been initiated.

Description is required

#3: Tell us about work planned for the next reporting period.

It is anticipated that all field investigations will be complete and bridge and boardwalk designs will be near 50%.

#4: Do you anticipate you will need to request a modification to your project agreement in the next six months (time extension, cost change, scope change, etc.)? If yes, please explain:

No

Not at this time.

Optional

Special Conditions

1. Cultural Resources-Survey Required

This agreement requires compliance with Executive Order 05-05 and/or Section 106 of the National Historic Preservation Act. RCO has completed the initial consultation for this project and a cultural resources survey is required. The Sponsor must submit to RCO the survey and receive from RCO a notice of cultural resources completion before any ground disturbing activities can begin. Ground disturbance started without approval will be considered a breach of contract. In the event that archaeological or historic materials are discovered while conducting ground disturbing activities, work in the immediate vicinity must stop and the Sponsor must ensure compliance with the provisions found in this agreement. All cultural resources work must meet reporting guidelines outlined by the Department of Archaeology and Historic Preservation and Section 106 of the National Historic Preservation Act (if applicable).

In the event that the Army Corps of Engineers makes a different cultural resources treatment recommendation for areas within their jurisdiction, RCO will defer to the determination made by the lead federal agency.
